

UTCr-Bulletin N° 2

BIPM Time Department

29 February 2012

The BIPM Time Department starts today the regular publication of daily values of [$UTCr-UTC(k)$] in the frame of the Pilot Experiment on Rapid UTC started on 1 January 2012.

We have included weekly files with results since 30 January 2012. In the future, new values will be available every Wednesday.

Access to results and related documents is through <ftp://tai.bipm.org/UTCr/>

I remind you that these results should not be considered as a mean of assessing the traceability of the UTC(k) to UTC; for this, *BIPM Circular T* remains the unique official document.
