 Information on the web pages
<http://www.betime.be/>
- ORB provides a time dissemination via phone and modem to synchronize PC clocks on UTC(ORB). The system used is the Time Distribution System from TUG, which produces the telephone time code mostly used in Europe. The baud rate used is 1200. The access phone number is 32 (0) 2 373 03 20. The system is updated periodically with DUT1 and leap seconds
- PTB
- Telephone Time Service
 The coded time information is referenced to UTC(PTB) and generated by a TUG type time code generator using an ASCII-character code. The time protocols are sent in a common format, the "European Telephone Time Code". Access phone number: +49 531 51 20 38.
- Internet Time Service
 The PTB operates three time servers using the " Network Time Protocol " (NTP), see <http://www.ptb.de/cms/en/ptb/fachabteilungen/abtq/fb-q4/ag-q42.html> for details and explanations.
- The hostnames of the servers:
 ptbtime1.ptb.de
 ptbtime2.ptb.de
 ptbtime3.ptb.de
 PTB also provides a secured NTP time service. This service applies NTP's pre-shared key approach. It arose from PTB's particular duty to provide a secured NTP service for the smart grid initiative of the German Federal Ministry of Economic Affairs and Energy. The service is restricted to authenticated access only.
