VNIIFTRI TWSTFT Station Report

Andrey Naumov, Yury Smirnov
VNIIFTRI

Plan:

1. New realization strategy of UTC(SU)
2. Calibration results of TWSTFT VNIIIFTRI – PTB link in year 2012
3. TimeTech Optic Line testing results vs SU01 and SU02 in VNIIIFTRI zero base
4. Current Status of SU01 station
5. Information from Intersputnik about AM-2
6. Information of 7-th International Symposium “Metrology of Time and Space”

1. New realization strategy of UTC(SU)

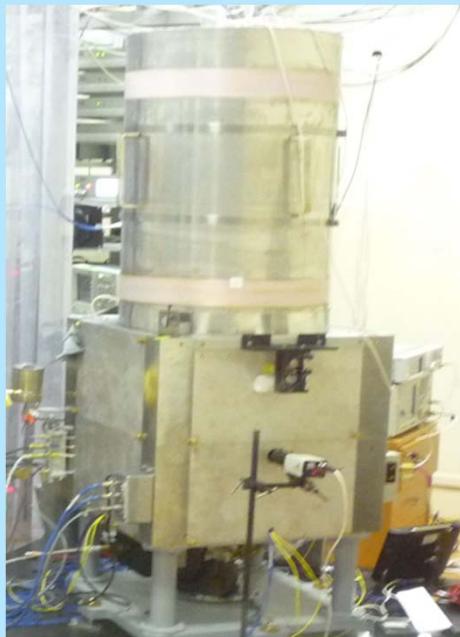

TA(SU) starting MJD 56289 daily
calculated on the basis of
the frequency difference measurement
Cs Fountains and H-Masers

UTC(SU) daily calculated on the
basis of TA(SU) and corrected one
time in month for providing
 $UTC - UTC(SU) \leq 10 \text{ ns}$

1 pps UTC(SU)
real-time
realization

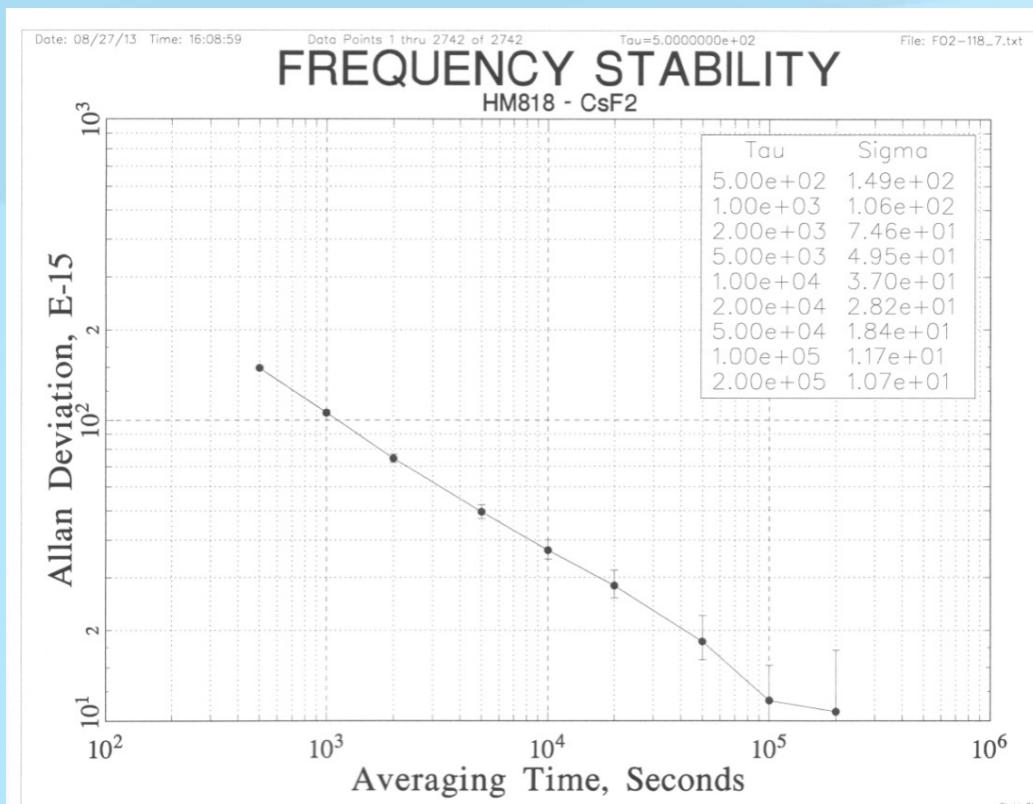

$U_B : \text{CsF1} \leq 2.0 \text{ E-15}$

$U_B : \text{CsF2} \leq 5.0 \text{ E-16}$

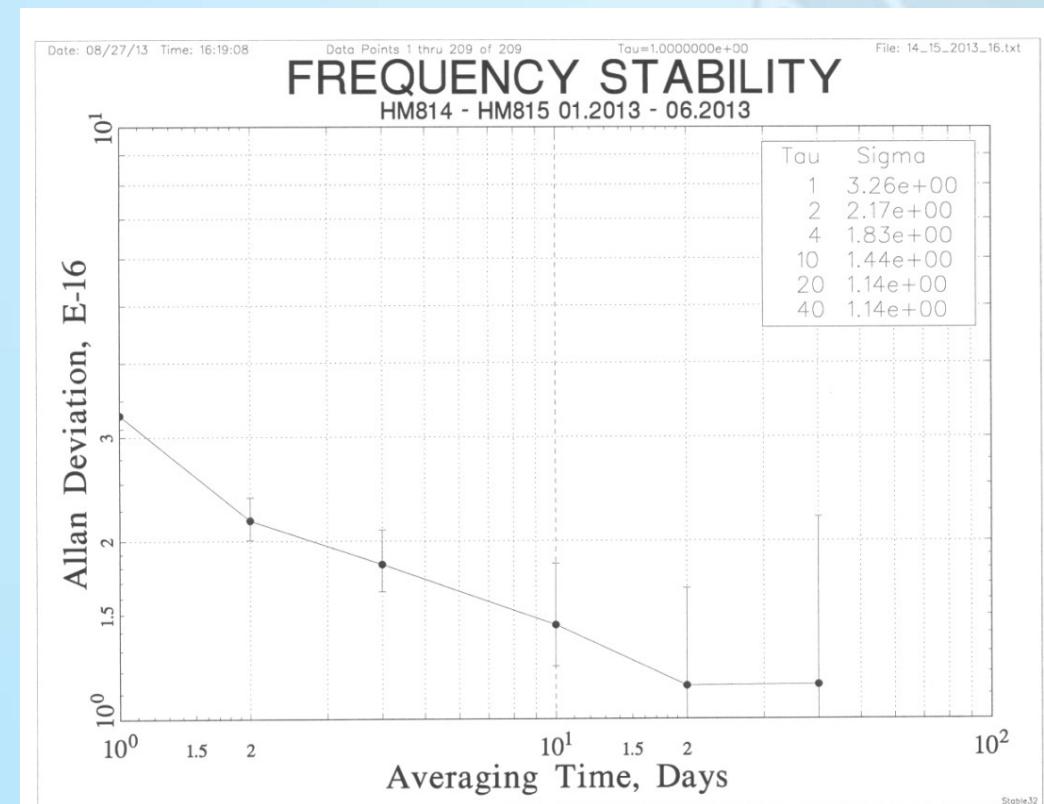

8 H-Maser CH1-75A
to keeping TA(SU)

VNIIFTRI

Clocks Characteristics

Instability of CsF2 vs HM 818

Instability for HM 814 and HM 815
(frequency drift removed)

2. Calibration results of TWSTFT VNIIFTRI – PTB link in year 2012

Calibration object and transportable calibration equipment

Calibration object –
fixed TWSTFT SU01 station

Mobile TWSTFT
station SU02

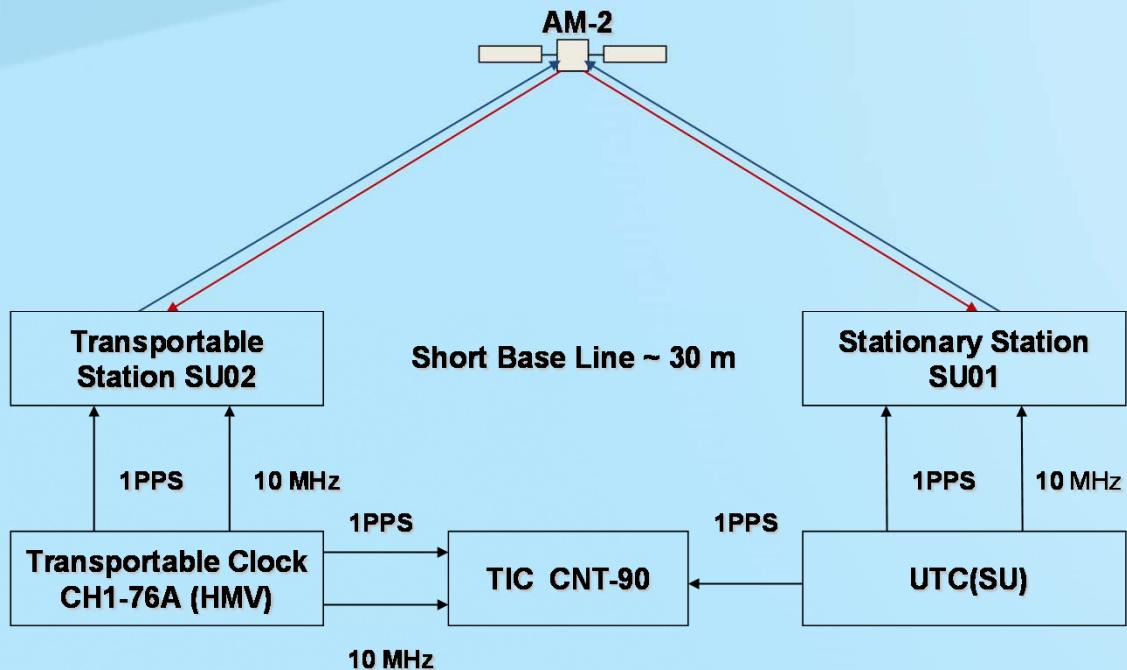

Transportable GNSS
receiver TTS-3

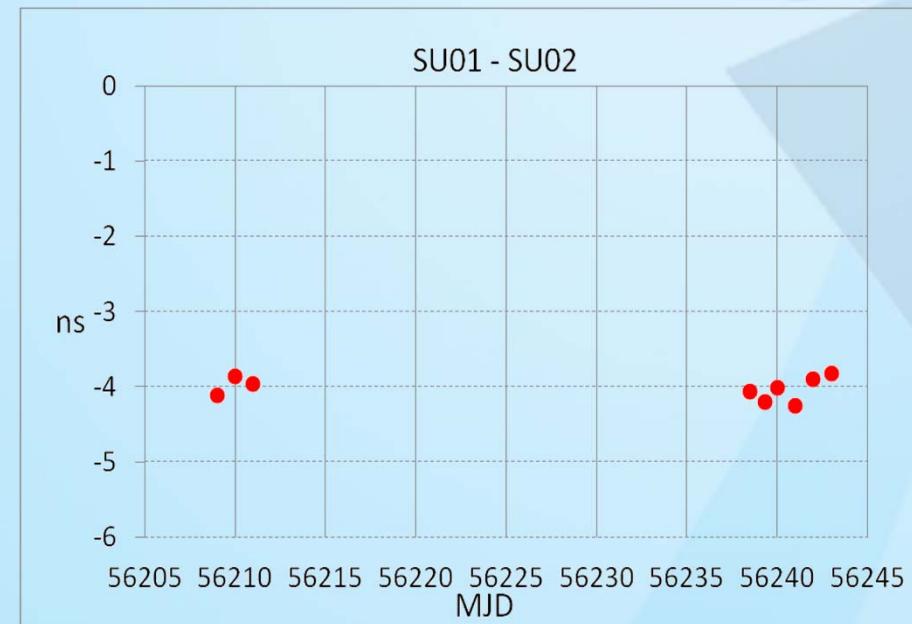

Transportable passive
H-Maser CH1-76A

VNIIFTRI

SU01 and SU02 calibration results in VNIIFTRI zero base

SU01 and SU02 stations connection schematic in VNIIFTRI

SU02 before and after trip in VNIIFTRI Zero base

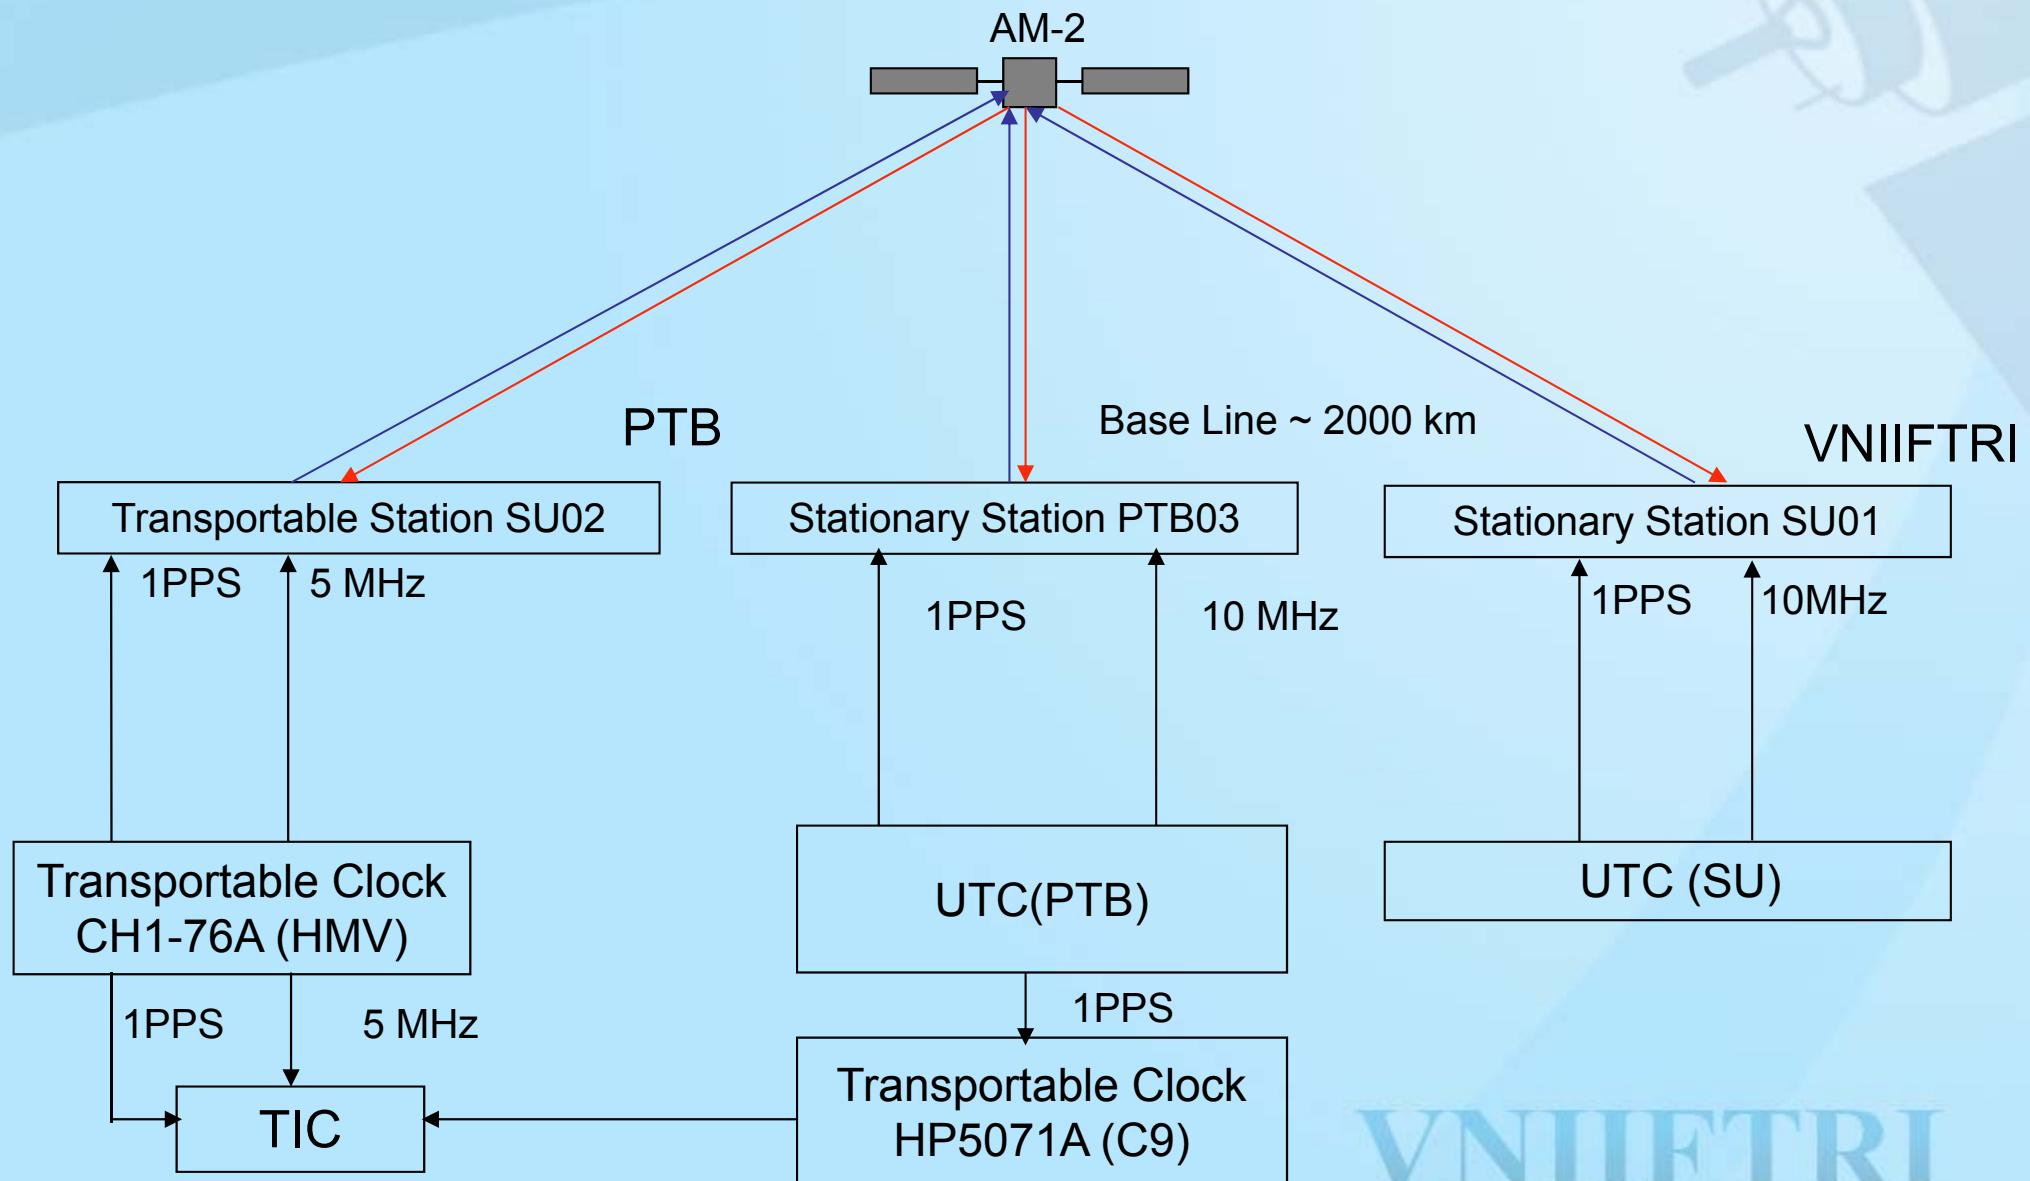

SU01 and SU02 mutual calibration results in both cases were identical and
SU01 - SU02 = - 4.0 ns with uncertainty $u_B \leq 0.5$ ns

Route of the trip

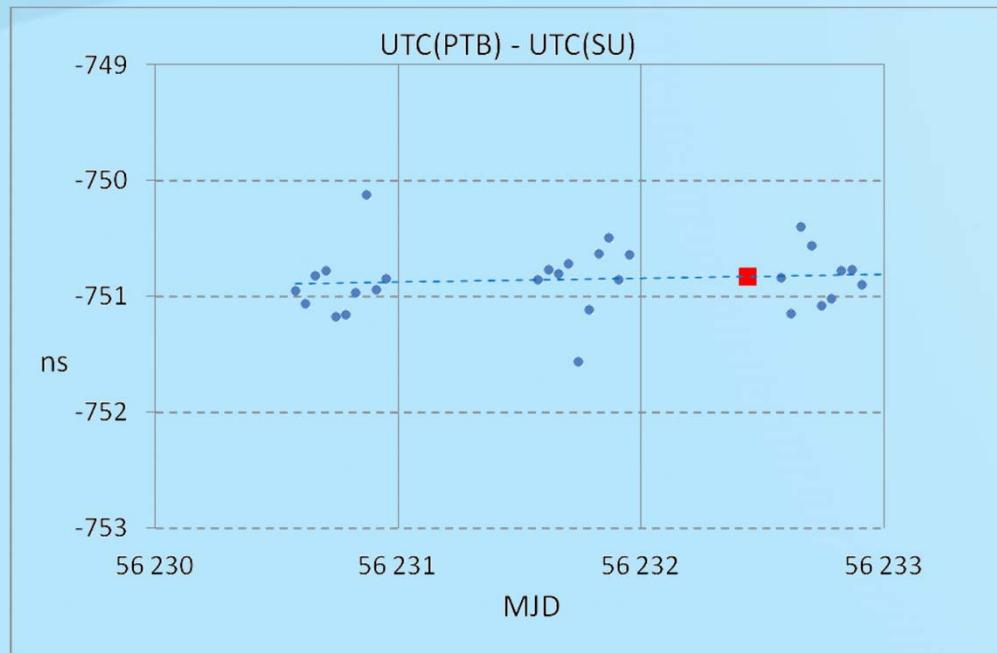

VNIIFTRI

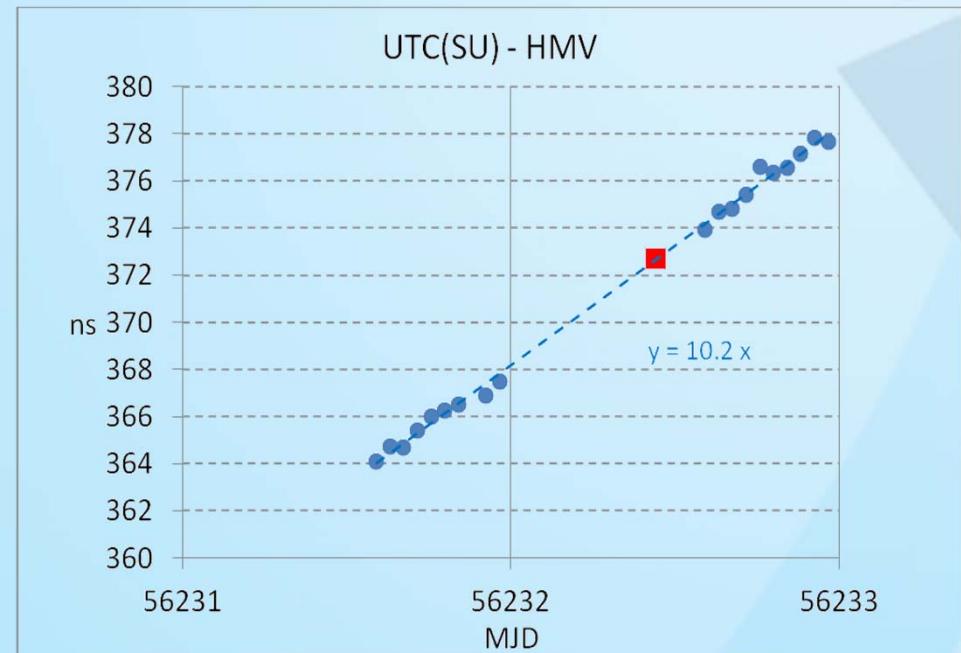

SU01, SU02, PTB03 connection schematic

Comparison results between UTC(PTB) and UTC(SU) stations SU01 and SU02

PTB03 – SU01

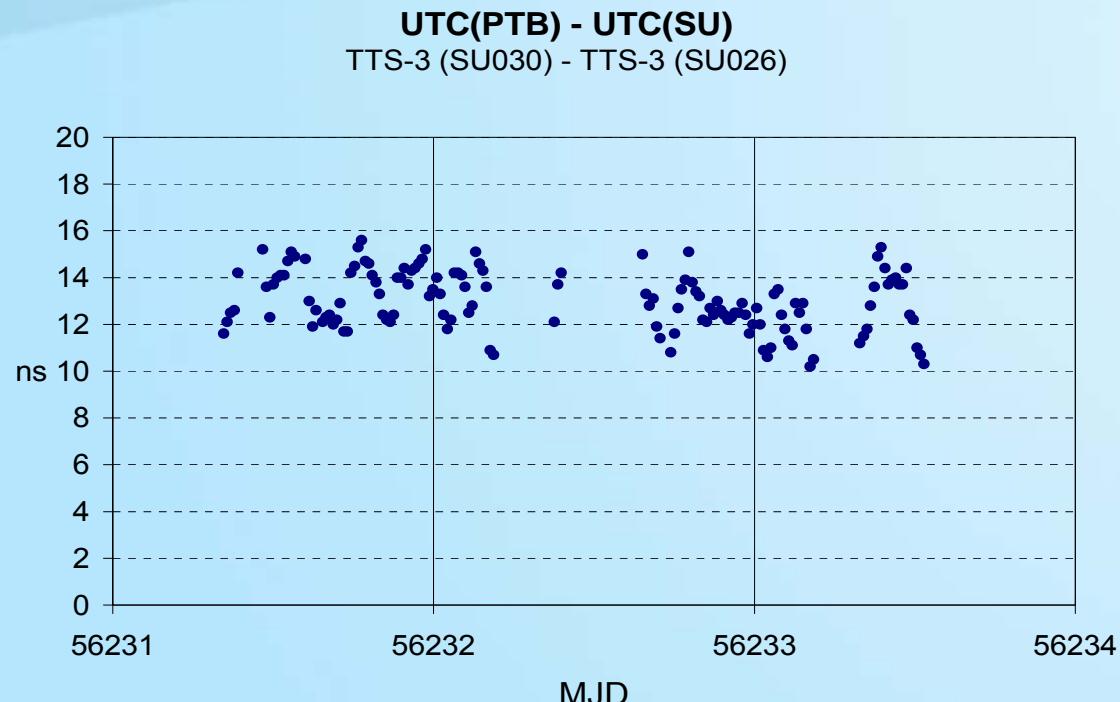

SU01 – SU02 (SU02 in PTB)

- – values obtained by interpolation on moment of UTC(PTB) and HMV time scales comparisons

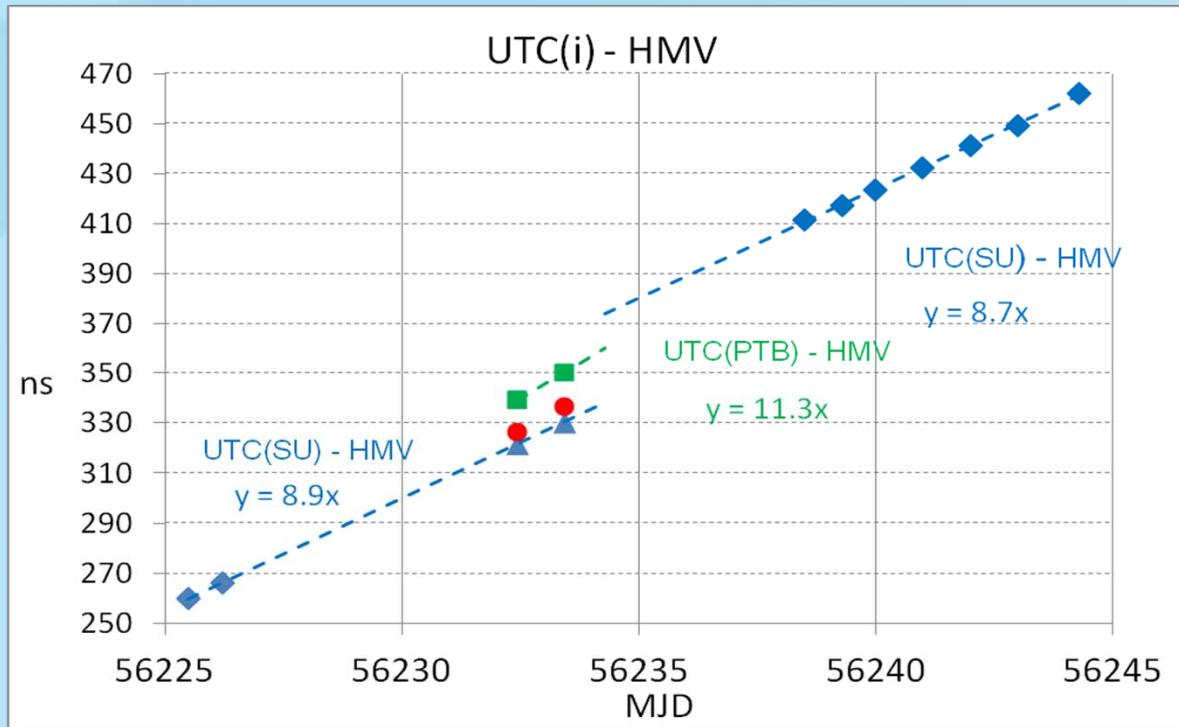

Uncertainty of UTC(PTB) and UTC(SU) time scales comparisons: $U_A \leq 0.3 \text{ ns}$ $U_B \leq 1.0 \text{ ns}$

UTC(PTB) and UTC(SU) time scales comparison results by GPS signals

MJD	UTC(PTB) - UTC(SU) ns	Number of common-views	Standard deviation for 1 day ns	u_B ns	u ns
56231.50	13.5	56	1.3	3.0	3.3
56232.50	12.9	48	1.2	3.0	3.2
56233.50	12.4	41	1.4	3.0	3.3

Transportable clock

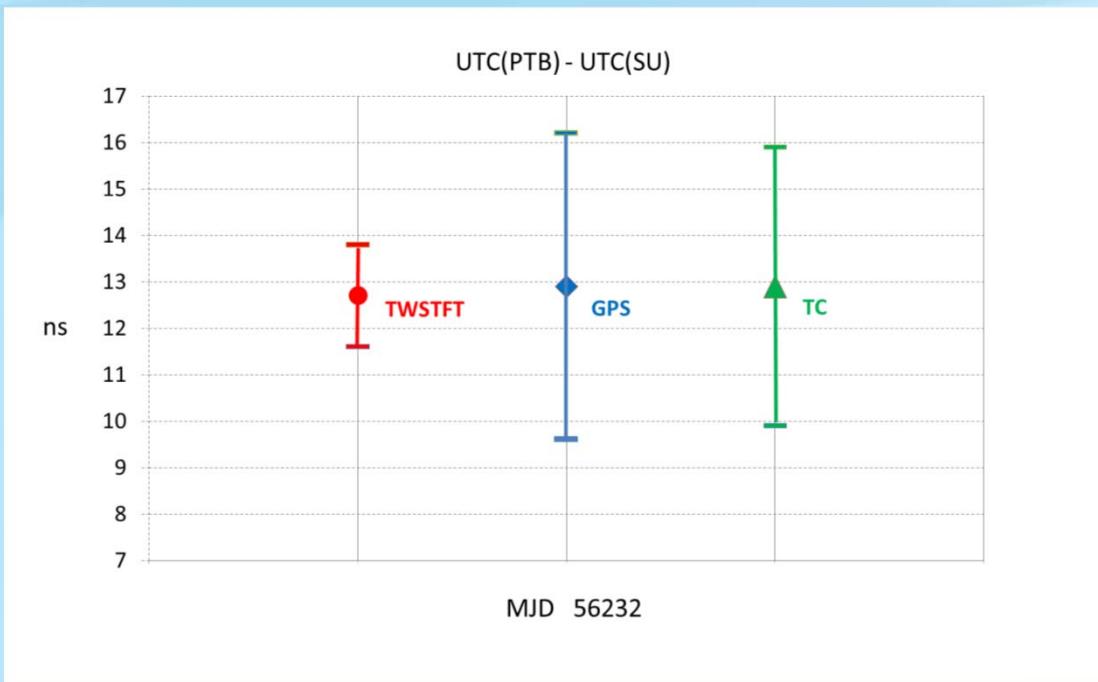

- ◆ - UTC(SU) and HMV time scales comparison results on VNIIFTRI
- ▲ - measurements forecast
- - values obtained on basis of HMV time scale movement forecast and as amended relativistic and Sagnac effects corrections
- - UTC(PTB) and HMV time scales comparison results through C9 from PTB

MJD	UTC(PTB) – HMV ns	UTC(SU) – HMV (forecast) ns	Relativistic effects correction ns	Sagnac effects correction ns	UTC(SU) – HMVc* ns	UTC(PTB) – UTC(SU) ns	u_B ns
56232.44	339.2	321.5	10.2	-5.4	326.3	12.9	3.0
56233.43	350.5	330.2	11.6	-5.4	336.4	14.1	3.0

* HMVc – with relativistic and Sagnac effects corrections

UTC(PTB) and UTC(SU) time scales comparison results

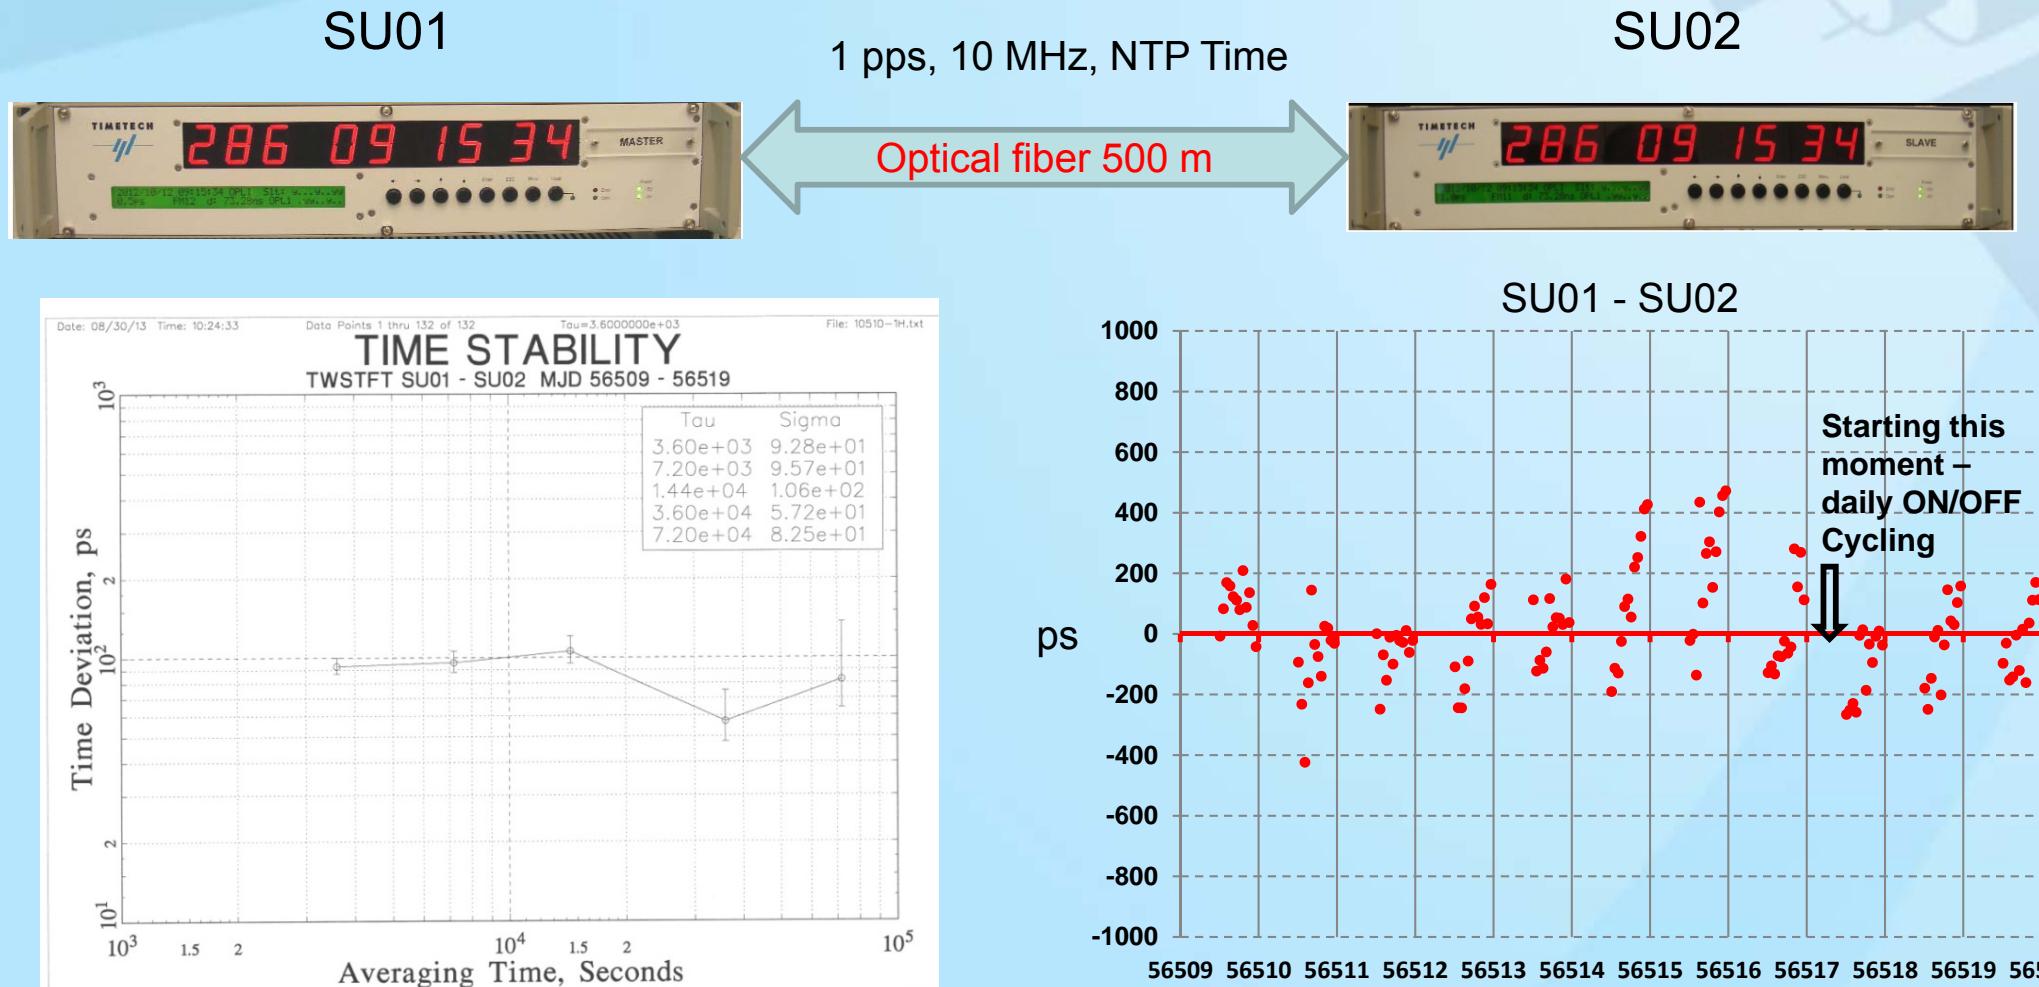

PTB03 – SU01 TWSTFT link calibration with the mobile TWSTFT station SU02, a transportable GNSS receiver and a transportable H-Maser have been successfully completed.

During this experiment calibration corrections CALR for the SU01 station relatively to PTB03 station were obtained which amount to 764.0 ns and an uncertainty u of less than – 1.1 ns. This result obtained with SU02 station was confirmed with the two other independent methods, although these were less accurate. The result was registered in BIPM and have identification CI 281.

New ITU files in accordance with CI 281

3. TimeTech Optic Line testing results vs SU01 and SU02 in VNIIIFTRI zero base

MJD

VNIIFTRI

4. Current Status of SU01 station

- Starting from MJD 56352 SU01 TWSTFT data uploading to BIPM and VNIIIFTRI ftp's
- From MJD 56439 CI 281 present in VNIIIFTRI and PTB ITU files
- From MJD 56564 BIPM will going to UTC – UTC(SU) calculations from GPS/GLO to TWSTFT data

5. Information from Intersputnik about AM-2

- AM-2 guaranteed will operate up to 31 December 2013
- AM-2 possibly will operate in Jan and Feb 2014 (without guarantee)
- AM-4R will launched in year 2014 (no detailed information)

6. Information of 7-th International Symposium “Metrology of Time and Space”

- VNIIFTRI in year 2014 (approximately in dates 8 - 14 September) is planning to organize and making 7-th International Symposium “Metrology of Time and Space” in Suzdal city, in Russia.
- VNIIFTRI invites to participate in symposium and ready to host the 22 CCTF TWSTFT WG in Russia jointly to the 7-th International Symposium Metrology of Time and Space.

Welcome to Russia!

VNIIFTRI

Thank you for attention

*Special thanks to
Dr. A. Bauch and Dr. D. Piester for
help and support with calibration*

VNIIFTRI
