SUBJECT: Time Scale – Certificate of Calibration

Dear Mr. Terrence Jones,

Microchip certifies that the Precise Time Scale System (PTSS) meets or exceeds its published specification at the time of its manufacture. The system synchronization to Coordinated Universal Time (UTC) is traceable to the United States Naval Observatory (USNO) via a USNO calibrated Two-Way Satellite Time Transfer (TWSTT) link.

The system was calibrated on the factory floor at Microchip using the same cables, GNSS antenna and GNSS receiver that were used for the system installation. The results for the system calibration are outlined below. The block diagram shows the configuration used for the calibration.

System Calibration Test Configuration

Part Number	4380A-TS
Serial Number	V07988
Calibration Value	5.36 ns
Date of Calibration	25 NOV 2020

Respectfully,

*Tom Bittancourt*
